Mr. Lemmon is a Senior Traffic Engineer with Traffic Analysis & Design, Inc. With over 12 years of experience, he has managed and performed a wide range of traffic engineering, transportation planning, and parking studies for both public and private sector clients throughout Chicago and Northern Illinois.

Mr. Lemmon has considerable experience performing traffic impact studies for land uses including residential, commercial, healthcare, educational, and sporting/special event venues. His varied project experience also includes neighborhood traffic studies, multimodal planning, downtown circulation, parking analysis, and transit-oriented development. Mr. Lemmon has actively participated in dozens of community workshops, design charrettes, and advisory committees regarding transportation and parking issues.

Recent projects include the Northwestern Campus Traffic & Parking Study and Transportation Management Plan, the CDOT West Loop Circulation Study, the Prairie Grove Transit-Oriented Development Plan, Chicago Metered Parking Inventory, North Central College Master Plan, and campus traffic/parking studies at Evanston, Glenbrook, and Skokie Hospitals.

Mr. Lemmon's experience provides an understanding that results in effective solutions for all modes of transportation.
